

HIGH-QUALITY PREMIXES

**Individual high-quality premixes for
the food industry**

MADE IN GERMANY

MIAVIT FOOD

High-quality premixes for food products, beverages and dietary supplements

Why MIAVIT Food?

As a family-run company, we offer you maximum flexibility and reliability. Thanks to our short decision-making processes, we are able to handle your request quickly all the way through to delivery, thus ensuring swift implementation of your project. Thanks to the expertise of our specialists, we also provide you with qualified support throughout the entire development process, along with complete reliability – the basic requirement for offering comprehensive customer service.

Where do we come from?

With our headquarter based in Essen (Oldenburg), MIAVIT was founded back in 1964 and is a family-run company now in the hands of the third generation. MIAVIT Food was officially established as a subsidiary of the MIAVIT group of companies in 2010. MIAVIT had already been producing customised vitamin premixes for the food industry since 2004. Right from the start, MIAVIT Food has been drawing on the expertise of

MIAVIT with regard to the mixing accuracy of vitamins, minerals and many other factors.

Years of experience and know-how

Dr Hans W. Niemeyer founded the veterinary practice over 60 years ago when he coined the guiding principle of our family business – prevention instead of medication – which is still firmly anchored in our philosophy today.

The name MIAVIT is an abbreviation for all important MInerals, Amino acids and VITamins that are contained in our premixes. As a competent partner in the areas of feedstuff, additives, minerals and vitamins, MIAVIT primarily produces and distributes premixes and special products mainly for use in animal nutrition in over 90 countries. As a result, our customers benefit not only from a global network of raw material suppliers but also from “our knowledge of the production of high-quality premixes for foodstuffs and dietary supplements”.

Vitamin premixes. Mineral premixes. Hydrocolloid blends. Energy premixes

Design, formulation and production to the highest standards

Quality & Product Safety

We guarantee the **consistently high quality of our premixes** by carefully selecting our raw materials, using high-quality ingredients and continuously checking the mixing quality. Based on certified processes and precise analyses of the high-quality raw materials used, we guarantee you a high degree of product safety.

Quick Processes

Flexibility and customisation are our top priority. Thanks to this **hands-on approach** and the short decision-making processes of a family-run company, MIAVIT is able to offer fast and reliable delivery.

Customized Product Design

To meet our customers' requirements, the premixes are developed in **close collaboration with our customers**. Our specialists support you from the initial idea all the way through to the finished premix. And in doing so, MIAVIT Food relies on the understanding, experience and expertise of our employees.

Premixes

Premixes make it possible to add micronutrients homogeneously to the end product and thus to significantly reduce the risk of fluctuations in quality compared to individual batching. By using our products, our customers save on storage and process costs compared to using individual components, and enjoy **high-quality products**.

Flexibility & Reliability

We offer boxes with inner bags (individually on request) as well as minimum quantities. We guarantee **reliable on-time delivery**, even for customer projects implemented at short notice.

Service

We take a holistic approach to supporting our customers and are always here for you. On request, we will gladly produce a sample for you. Just ask your personal contact partner for more details. Due to our certified processes, it goes without saying that we offer you **absolute product safety** in this respect.

Our certifications:

Customized mixes in the highest quality

The perfect mix is produced for you – and demonstrated to you in all authenticity. It is our many years of experience and our eye for innovation that have made us so successful in the field of **vitamin and mineral premixes**.

We are always adapting and optimising our workflows and production processes, including for our **energy premixes**. Our expertise forms the basis of the individual character of your future recipes.

As a team, we benefit from each other's know-how and as such we are always developing further. And we are happy to let you take part in our development too.

Progress and growth are two important indicators: a good feel for trends such as plant-based food and the use of **hydrocolloid blends** constantly expand our range. We operate as a global player and attach great importance to developing a stable and ever-expanding view of the market.
